City, County Confirm 13th COVID-19 Related Death

LAREDO, Texas—The City of Laredo and Webb County have confirmed the 13th death in Laredo related to COVID-19. The City and County want to express their most sincere condolences to the family and want them to know that our counselors, as well as our support, are available.

A woman in her 60s had tested positive for COVID-19 and was being treated at Laredo Medical Center when she died on Friday, April 24, 2020.

Laredo Medical Center issued a statement:

“The Laredo Medical Center family is tremendously saddened by the passing of one of our associates. This person will be dearly missed by coworkers here in the hospital and by loved ones in their family and community. Throughout their longstanding tenure with the organization, this individual provided skilled, compassionate service to patients in direct patient care. Our hearts go out to the family and friends of this wonderful person and we pray for them during this tremendously difficult time.”

The City of Laredo Health Department reminds the public that the coronavirus can be present in their system even while the person presents no symptoms. Some may be asymptomatic, while others may initially have mild to moderate symptoms that can include high fever, cough and shortness of breath. The majority of patients will recover, but some may need to be hospitalized due to complications. The majority of our local positive cases have recovered while isolated or quarantined in their home. Please follow health department COVID-19 prevention guidelines regarding social distancing and proper hygiene. Persons should stay at home, not gather in groups and cover their nose and mouth when around others.

The Health Department continues to conduct contact investigation on persons who have tested positive to determine possible exposure to others. If the health department has not contacted you, there is no need to take any action at this time. If you feel ill, please contact your physician and monitor your symptoms.

In households with a positive person, there should only be one dedicated caregiver. Other family members must stay apart and practice good hygiene and physical distancing. The positive person should be in a dedicated room and must wear a mask and not gather with other family members. The caregiver should also wear a mask when providing care. This is extremely important as evidence points to strong clustering among positive persons.

Stay home if you are sick and call your doctor. Do not go to the doctor’s office, call your doctor first. If it is an emergency, call 9-1-1.

As of **12:00 p.m. on Saturday, April 25**, a total of 1,945 persons have been tested, 1,278 of those tests have resulted negative, 340 have resulted positive, 327 are pending, 93 have recovered, 23 remain hospitalized, and 13 have passed.

In order to safeguard legally-protected information, the City of Laredo is not publically releasing personal or identifiable information regarding any cases as it relates to COVID-19 testing, results or monitoring.

Please continue to do your part in preventing the spread of all diseases. Follow the guidelines below:

- Follow the City and County order to stay at home and practice physical distancing.
- Wash your hands often
- Wear a mask or face covering
- Avoid touching your face
- Avoid close contact with people who are sick
- Stay home when you're sick
- Cover all coughs and sneezes
- Clean frequently-touched surfaces
