Economic and Market Commentary: How times have changed

August 1, 2015

The incessant buzz surrounding whether the Federal Reserve will or won't initiate liftoff in September, got us thinking about how much times have changed. We can recall a meeting years ago in the board room on the 27th floor of our Downtown office building. It was with members of the New York Federal Reserve Bank, and the discussion centered on the possibility the target funds rate, 1% at the time, could be lowered another 25 basis points to 0.75% ... 0.75%!

We thought that was madness; now, we'd be jumping for joy over such a rate! And, frankly, we believe we will get to 0.75% at some point next year, likely in the first half of 2016. We also think the Fed will initiate its first increase in the funds rate in nine years at its meeting next month, the noise surrounding its late July post-meeting statement notwithstanding. If you strip that statement down, there were less than 10 word changes, with a lot of consternation focused on the addition of the word "some," as in policymakers need to see "some" further improvement in the labor markets to justify a rate hike. Honestly, this all sounds like word sniffing to me.

Based on the economic data and events since the Fed met in June and signaled a September move (July's was a non-press conference, non-forecast meeting, which is why there was so much obsession over word changes), it doesn't appear to me that policymakers are wavering. Definition of Weighted Average Maturity (1) & (2)

*(1) "WAM Days" is the mean average of the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid, (b) would be repaid upon a demand by TexPool, or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates set forth in (b) and (c) if their scheduled maturity is 397 days or less; and the later of the two dates set forth in (b) and (c) if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

*(2) "WAM Days" is calculated in the same manner as the described in footnote 1, but is based solely on the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid or (b) would be repaid upon a demand by TexPool, without reference to when interest rates of securities within TexPool are scheduled to be readjusted.

Definition of Average Monthly Yield (3)

*(3) This current yield for TexPool Prime for each date may reflect a waiver of some portion or all of each of the management fees.

How to Stay on Top of Your Water Cooler Conversations...Fed Jargon

Whenever the Federal Open Market Committee (FOMC) meets, it is hard not to run into news articles that are centered around the Fed Funds Target Rate and the possibility of the rate being raised in the near future. Within these articles, there is quite a large amount of economic and financial jargon that could use a little explaining. Here are a few phrases to arm yourself with when the water cooler conversations are centered around the Fed.

The Fed - Short for The Federal Reserve System, which is the central banking system of the United States. The president of the Federal Reserve System appoints the board of governors. The Federal Open Market Committee (FOMC) is a subset of the Fed. It is responsible for open market operations, (the purchase and sale of securities in the open market by a central bank), within the Fed. Referring to the "Fed" could mean both the Federal Reserve, and the FOMC.

Fed-speak - Vague, wordy statements made by the Fed to prevent markets from over reacting to statements made by the Fed Chairperson. Here is an example from Janet Yellen from March 27th, 2014 - "I believe that the appropriate time has not yet arrived, but I expect that conditions may warrant an increase in the federal funds rate target sometime this year."

Hawk: An economist or policy maker who is in favor of higher interest rates in order to keep inflation in check. This individual is more concerned with interest rates and inflation than unemployment. Remember Fed Chair Paul Volcker (1979-1987)? He was a hawk. *

Dual Mandate: Refers to The Federal Reserve Act amendment of 1977 which states that the objectives of the Federal Reserve

are 1) maximum employment and 2) stable prices. Generally speaking, when we talk about the FOMC raising the Fed Funds Target Rate, the two major factors driving the FOMC's decision are inflation and unemployment.

Shallow Hike: When/if the FOMC decides to raise the Fed Funds Target Rate, many economists believe that it will happen slowly, and in small (shallow) increments. A 0.25% hike will likely be the FOMC's first move, in which they may sit on that rate hike to see what happens to the economy.

Lift-off: Lift-off would be initiated by an increase in the Fed Funds Target Rate (which currently ranges from 0.0% to .25% and has been that way since 2008). This would signal that the FOMC believes the US economy has generally recovered from the Great Recession. Most investments professionals and investors in general are ready for this to happen

Dot Plot: A visual representation of where each voting member of the FOMC projects the Fed Funds Target rate will be in the near and long term future. Check out our [May newsletter](#) for a more in depth look at the Dot Plot .

Dove: An economist or policy maker who is in favor of expansionary monetary policy, achieved by keeping interest rates low to encourage consumer borrowing and spending. Concentrated more on the unemployment mandate of the Fed than the inflation mandate. Fed Chair Janet Yellen is considered "dovish". So were Ben

Looking for Some Improvement

During its July meeting, the Federal Reserve (Fed) maintained an upbeat assessment of the economy and the prospect of raising interest rates before the end of the year. The latest wrinkle from the Fed is that it would like to see “some” additional improvement in the labor market before raising rates. While it may be a futile endeavor to quantify what “some” means, this certainly gives the Fed latitude to adjust its threshold for tightening monetary policy later this year.

While far from outstanding, the economy appears to have gained momentum going into the second half of the year. Second quarter Gross Domestic Product grew 2.3 percent, and the first quarter saw an upward revision of 0.8 percent. Needless to say, the next two jobs reports for July and August will play a critical role in the Fed’s decision to tighten rates at one of its three remaining meetings this year. The wildcard could be the continuing collapse in commodity prices, jeopardizing the Fed’s confidence that inflation will move back towards its 2 percent objective over the medium term.

Although a September move from the Fed is not out of the question, federal funds futures contracts put a higher probability on the first rate hike occurring at the December meeting. The markets were generally calm in July, with U.S. corporations posting mostly solid earnings and the Greek debt crisis fading into the background on yet another last-minute temporary solution. For some, the case for raising interest rates may not be exceedingly strong. However, after six-plus years of maintaining a zero-rate policy the Fed may be anxious to start the process to see how the markets react when the punch bowl is finally taken away.

Portfolio Strategy

Short-term rates continued to be well anchored by the Fed’s zero interest target rate policy. However, we are preparing for the Fed to eventually lift rates in the second half of 2015. As always, we remain focused on safety, liquidity and then yield. Texas CLASS is rated AAAM by Standard & Poor’s.
